THE

PREFACE.

THE Alterations in the Cuſtoms, are ſo many and frequent, that a thorough Knowledge thereof is not to be attained without the greateſt Application, eſpecially was it not for ſome proper Aſſiſtance; for which none has been ſo deſervedly eſteemed as the late Mr. Edgar, *whoſe Treatiſe is the Product of much Care and Pains; but as it appears to be rather the Effect of Speculation, than real Practice, the Errors which he unwarily fell into, are the more excuſable, as in theſe Inſtances,* Fiſh, Barillia, Ginger, Unrated Glaſs Manufactures, Millboards, *and* Scaleboards, *the Duties and Drawbacks whereof are wrong charged;* Spaniſh Tobacco, *charged with the Two Thirds Subſidy;* Kid-skins in the Hair, Checks, and Waſhballs, *the two New Duties omitted;* Callicoes *not charged with the Duty of* 15 per Cent. *for thoſe Sorts which are called* Muſlins; ſeveral Sorts of Skins, *the Drawbacks wrong; and*

he

he is mistaken in his Notion of the Duty of One per Cent. *And the Drawbacks of* Wine *and* Currants; *with many other of the like Nature, which do not now occur to my Memory.*

Besides which, by the several new Regulations the Customs have undergone since the Publication of his Book (which is now ten Years) a great Part thereof is render'd not only useless, but of dangerous Consequence, in misguiding those who are not apprized of such Variations.

From these Considerations, I concluded, it would not be esteemed an unacceptable Piece of Service, offer'd as well to the Merchant as the Custom-House Officer, to spend some Time in reviewing and correcting the said Tract, and making all such proper Additions and Improvements as might bespeak it complete.

In which Attempt, I have proceeded,

FIRST, *To add the Continuations and Appropriations of the several former Branches, which have been affected by subsequent Acts, together with such entire* New Duties *as have been since imposed; several Schemes of* Bounties *and* Drawbacks; *the Duties of* Balliage, Package, *and* Scavage *payable by Strangers to the City of* London; *and the Substance of the Custom-Laws from the* 12th *Year of Q.* Anne, *to the* 9th *of His present Majesty.*

SECONDLY, *To illustrate the Computation of the Duties by great Variety of New Examples; which being the most difficult and material Part of the Business within Doors, is the more largely insisted on,*

on, in the most nice Cases of French, East-India, *and other Goods: And to make several Improvements in the Waterside Business, by adding such Examples and useful Hints as should be most conducive to the Information of those concerned.*

THIRDLY, *To carefully compute all the* Duties *and* Drawbacks *anew, adding, in the due Order, the* French *Goods (which before were separate;) References to such Goods as are rated under some particular Head, or by a different Name; the Alterations in the Duties on* Apples, Beaver-skins, Bound-Books, dying Goods, Linnen chequer'd, strip'd, *&c.* Millboards, Paper, Pasteboards, Pepper, Pictures, Plate wrought, Scaleboards, Sope, Spice, Starch, Tobacco, and Wine *imported*; Coals, Dying and other Goods, *exported. And, for the greater Ease and Certainty in Computation, have added Numbers to the Letters of Reference on the Right-hand Pages of the Rates Inwards, to denote the particular Article of the Imposts* 1690, *or* 169⅔ *each Species of Goods are liable to; whereas, before for the Want of such a Guide, even the most intelligent Officer of the Customs would be at a Loss to know under what general Head many Kinds of Goods are chargeable. As for Example, the Reference of BUGLE declares it pays the four Subsidies and Impost* 1690. *but upon Recourse to the said Branch of Impost, no such Head is to be found, so that a general Knowledge of the Quality of all Goods is to be supposed, or else you would be often left in the Dark; as in this Instance, should you be ignorant that BUGLE is a GLASS-MANUFACTURE, by what Denomination would you charge it? but by the Addition of the Number* 13. *such Doubt is removed.*

FOURTHLY,

FOURTHLY, *To render the whole both plain and useful, by reducing ſeveral Things into Order, which were confuſedly diſperſed, rejecting all that was ſuperfluous, clearing up what was either doubtful or unintelligible, and adding all ſuch Variations and Improvements as were capable of being made to the End of the Seſſion of Parliament,* Anno nono Georgii; *which will be found to be ſo many, that ſcarce a Page remains in its primitive State: But as for thoſe Goods which have been ſubjected to new Regulations by this Year's Seſſion of Parliament (being moſtly* Coffee, Tea, Chocolate, Cocoa Nuts, and Cocoa Paſte, *which are to be under the Direction of the Exciſe) muſt refer to the Laws themſelves, this Treatiſe being almoſt printed off, before ſuch Alterations could be known.*

To conclude, if upon a ſerious Examination, there ſhall be derived, either Service or Satisfaction, it entirely anſwers my Intention.

 PAR-

PARTITION

The

SECOND.

Having dispatch'd the first general Division, I come now to shew more particularly the Manner and Method of computing the Duties on all Goods imported, and to assist you with several compendious Schemes, Forms, Rules, and Directions, for your more certain and expeditious Operations.

Tonnage.

THE Operation hereof cannot be better exemplified than by presenting you with a Table of the particular Net Duties, for one Ton of all Wines, with the several Discounts deducted, as specified under each Branch, according to the several Variations of Entry. And in Consideration, it will be difficult to work for odd Gallons, I have added a Decimal Table for one Gallon, which will serve for any Number of Gallons by multiplying each Duty thereby.

POUNDAGE,

POUNDAGE.

AS the Duties on Poundage Goods are computed by confidering the feveral Valuations under the Title of *Rates*, in Part the 2d, the 20th Part, or 5 *per Cent.* whereof being the Grofs Subfidy; before we can proceed further, I muft recommend the following Table, to be learn'd by Heart.

The grofs Subfidies and other relative Duties being found by the Letters in the laft Column of Part the 3d, referring to the feveral Branches, each Species of Goods are chargeable with, I fhall next affift you with Directions for deducting the refpective Difcounts.

Difcount of 10 *per Cent.* is double 5 *per Cent.* or accounting all but the Right-hand Figure of the Pounds, as fo many Pounds, and every Unite of the Right-hand Figure, as two Shillings.

By the 5 and 10 *per Cent.* all other Discounts may be found, thus

25	*per Cent.* is	$\frac{1}{4}$ of the given Sum.
15		10 *per Cent.* and the Half thereof.
12 and $\frac{1}{2}$		10 *per Cent.* and $\frac{1}{4}$ or rather $\frac{1}{8}$ of the given Sum.
8		10 *per Cent.* deducting $\frac{1}{5}$.
7 and $\frac{1}{2}$		5 *per Cent.* and the $\frac{1}{2}$ of the same added together.
6 and $\frac{2}{3}$		5 *per Cent.* adding $\frac{1}{3}$.
6 and $\frac{1}{4}$		5 *per Cent.* adding $\frac{1}{4}$ or $\frac{1}{4}$ of $\frac{1}{4}$ of the given Sum.

4 and $\frac{1}{2}$		5 *per Cent.* deducting $\frac{1}{10}$.
4		5 *per Cent.* deducting $\frac{1}{5}$.

$\frac{1}{3}$ or — 6 8		the 5 *per Cent.* of 5 *per Cent.* adding $\frac{1}{3}$.

Thus having premised all that is necessary, now let us enter upon the Method of Computation; to demonstrate which, I shall spend several Pages in exhibiting all that could be thought conducive thereto.

12 $\frac{1}{2}$ *per Cent.* Discount-	3.	9.	0	3, 45
N° 6—if paid—	24.	3.	0	24, 15

The Discount being 10 *per Cent. per Annum*, is 12 $\frac{1}{2}$ *per Cent.* for the first 15 Months, when paid within 30 Days from the Ship's Report; but, for each of the said 15 Months elapsed before Entry, the Importer loses one fifteenth Part of the 12 $\frac{1}{2}$ *per Cent.*

Example.

Suppose the above Entry not to have been made, till two of the fifteen Months had been expired, the Operation would be thus,

N° 6—less 8 *per Cent.* as before—	27.	12.	0	27, 60
12 $\frac{1}{2}$ *per Cent.* less $\frac{2}{15}$ —	2.	19.	9 $\frac{12}{20}$	2, 99
N° 6— 2 Months elapsed—	24.	12.	2 $\frac{8}{20}$	24, 61

Here, two of the 15 Months being elapsed, thirteen only remain to be allow'd for, after the Rate of 10 *per Cent. per Annum*, as thus,

	27.	12.	0	27, 60
12 Months at 10 *per Cent.*—	2.	15.	2 $\frac{8}{20}$	2, 76
1 Month— $\frac{1}{12}$ —	0.	4.	7 $\frac{4}{20}$	, 23
13 Months unexpired—	2.	19.	9 $\frac{12}{20}$	2, 99
	24.	12.	2 $\frac{8}{20}$	24, 61

Or thus,

	27. 12. 0	27, 60
12½ *per Cent.* less $\frac{2}{15}$	2. 19. 9 $\frac{12}{20}$	2, 99

In the two last Examples, the Duties are imposed in one Total Sum, but ist be proportionably applied to the several Branches, to which they are oject, according to the Variation of Entry.

Now you have gone through the Computation of several single Articles, l may be supposed to have a tolerable Notion thereof, the next Step shall to propose Entries of sundry Species of Goods together.

To perform the Operation whereof, the most easy and certain Way would to assign a proper Column for each particular Branch (or at least the most terial) and therein charge each Duty of every Article as you proceed, in the nner hereafter exemplified.

But as this Method is not ſo practical, by Reaſon of the great Number of Branches, which would extend further than the uſual Size of a Bill of Entry would admit of, I will therefore propoſe the Uſe of but one Column only, for the Old Subſidy, and work for the other Branches in the vacant Spaces of the Bill; which is the Practice of the Port of *London*, and ſhall be uſed in the following Operations.

East-India Goods,

OF these, some are *Rated*, and pay the Duties certain; some are *Unrated* and pay the Duties *ad Valorem*; and some are *partly Rated*, and *partly Unrated.*

Rated,

Are to be computed as the like Goods coming from any other Place, only observing to charge 20 *per Cent.* for Impost 1690. if they are manufactured.

These Goods (and likewise *Coffee*) may be landed by Bills at Sight, and Security taken under the common Seal of the Company, for Payment of one Half of the Duties at the End of six Kalendar Months, from the Time when the Ship was, or should have reported; and the other Half at the End of twelve Kalendar Months from the said Report; and to enjoy the same Allowances and Deductions as other Merchants paying down the Duties before Landing. Unrated Goods,

Paying Duties *ad Valorem* (except (*a*) *Coffee,* which is to be valued upon the Oath of the Importer; and (*b*) *Japann'd* and *Laquerr'd Wares,* which are to pay according to the gross Price at the Candle) are to be computed from the Value sold for at the Candle; out of which there is first to be deducted so much as the Net Duties, payable for the same, do really amount unto (except the Duty of 5 *per Cent.* to the Crown for the Use of the Company) and so much as the Company shall, *bonâ fide,* allow the Buyers for Prompt Payment; and likewise 6 *per Cent.* upon the whole Value, to the said Company for their Charges in keeping the Goods from the Importation to the Time of Sale.

But Security must be given (before Landing) with two Sureties, to pay the Duties according to the Value sold for; and to expose the Goods to Sale within Three Years from the Importation. [2 & 3 *Ann.* c. 9. § 7. 7 *Geo.* c. 21. § 11.]

N. B. The Company's Allowance to the Buyer, for Prompt Payment, is 6 ½ *per Cent.*

The Method practised in computing the Duties upon *Unrated East-India Goods,* in Conformity to the aforesaid Act, is illustrated in the following Example.

252 *Gallons of* Arrack, *sold at the Candle for* —— *l.* 100. 0. 0

The gross Value ——	*l.* 100. 0. 0	——————		*l.* 100. 0. 0
The uncertain gross Duties	33. 0. 0	The cert. Duties	47. 4. 0	} 59. 14. 0
Which advances the Value to ——	133. 0. 0	The Charges ——	12. 10. 0	}
		Which reduces the Value to ——		40. 6. 0

Then say,

As the Gross Value of *l.* 133. 0. 0. is to *l.* 33. the Gross Duties, so is *l.* 40. 6. 0. the Net Value to the Net Duties of } — 9. 19. 11 ¾

The reduced Value —— 30. 6. 0 ¼

(*a*) 10 *Ann.* c. 29. (*b*) 12 & 13 *W.* III. c. 11. § 15.

The

The Truth of this Method is thus demonſtrable, for if,

To the reduced Value (as before)		30.	6.	0 $\frac{3}{4}$
Are added	the Duties certain	47.	4.	0
	the Duties uncertain	9.	19.	11 $\frac{1}{4}$
	the Allowance of 12 $\frac{1}{2}$ *per Cent.*	12.	10.	0
The Total makes the Value ſold for		100.	0.	0

By which it is evident no more is deducted than the Duties and Charges do really amount unto.

See the Operation at large in Example the fifth.

The Duties on Japann'd and Lacquer'd Wares, are, by the 12 and 13 *W.* III. . 11. §. 15. to be computed according to the Grofs Price at the Candle; erefore not any Deduction for Duties, *&c.* as directed by 2 and 3 *Anne.*

By the foregoing Examples, appear the Nature and Reaſon of the Operation of the Duties on unrated *Eaſt-India* Goods, in all the ſeveral Varieties; but as in common Practice it would be too tedious to work for each reduced Value, I have, for your greater Eaſe and Diſpatch, added the following Table.

The total Net Duties payable and repayable upon unrated East-India *Goods, for every* 100 l. *Value, according to the Price at the Candle, and the Reduced Values thereof (in Decimals) for every* 20 s. *Value.*

The reduced Value of any Sum may be found, by turning the ſame into a Decimal, and multiplying it by the Sum in the above Table, anſwering to the ſame Commodity.

Arrack and Tea paying ſome Duties certain, and others uncertain, the Duties and Drawbacks cannot be computed, nor the Values reduced without aſſigning a Quantity.

Japann'd and Lacquer'd Wares pay according to the Groſs Price, therefore no Reduced Value.

The Method of computing the Duties upon Importation of Foreign Goods, being ſo fully demonſtrated, I cannot conceive it neceſſary to treat further on that Head, ſo ſhall next offer ſome uſeful Directions for Repayment of Duties on Exportation.

Draw-

Drawbacks on Exportation.

Foreign Goods imported, and afterwards exported to Foreign Parts (under the Regulations enjoyn'd by the ſeveral relative Laws in Partition the Fourth) within three Years from the Importation, accounting from the Maſter's Report of the Ship, are entitled to the Repayment of Duty.

The Manner of computing Drawbacks does not vary from what has been before taught at Importation, with which (after ſuch ample Inſtructions) you cannot but be well acquainted; ſo that the only further Aſſiſtance will be to ſubjoin a Scheme of what entire or proportionable Parts of each Branch paid at Importation, are to be repaid upon Exportation within Time: Being all the Exceptions to that general Rule of Drawingback all but a Moiety of the Old Subſidy.

Having gone through the ſeveral Branches of the Cuſtom Houſe Buſineſs within Doors, I ſhall now proceed to give ſome uſeful Inſtructions, relating to the Practice at the Water-ſide.

The Water-ſide-Buſineſs.

SUCH Goods as pay Duty by Weight, are to be brought to the King's Beam and weighed; out of which Groſs Weight are to be deducted,

Firſt, An Allowance in Conſideration of Draught, according to the following reſpective Weights, *viz.*

		C.	lb.	
Goods weighing	Under	1	1	Draught.
		C.		
	From	1 to 2	2	
		2 to 3	3	
		3 to 10	4	
		10 to 18	7	
		18 to 30	9	

Except Tobacco of the *Britiſh* Plantations, which is allowed only 8 lb Draught for every Hogſheoad of 350 lb, or upwards.

Secondly, The Draught being taken off, as before directed, you are next to deduct the Tare (which is an Allowance for Package) as ſpecified in the Table thereof, at the End of this Partition. For the more ready Operation whereof take the following Directions.

When the Tare is ſo much *per Cent.* take the aliquot Parts ; as

For	24	*per Cent.* take	$\frac{1}{4}$ of the groſs Weight, leſs $\frac{1}{6}$.
	21		$\frac{1}{4}$ leſs $\frac{1}{4}$.
	18		$\frac{1}{7}$ more $\frac{1}{8}$.
	16		$\frac{1}{7}$.
	14		$\frac{1}{8}$.
	12		$\frac{1}{8}$ leſs $\frac{1}{7}$.
	10		$\frac{1}{14}$ more $\frac{1}{4}$, or being reduced into Pounds, cut off the Right-hand Figure.
	8		$\frac{1}{14}$, or $\frac{1}{2}$ of $\frac{1}{7}$.
	7		$\frac{1}{16}$, or $\frac{1}{2}$ of $\frac{1}{8}$.
	6		$\frac{1}{16}$ leſs $\frac{1}{7}$.
	4		$\frac{1}{4}$ of $\frac{1}{7}$.
	2		$\frac{1}{8}$ of $\frac{1}{7}$.

When the Tare is by the Bag, Cask, *&c.* multiply the Number of Bags, *&c.* and Tare together, and the Product is the total Tare.

When the Tare is not aſcertained, but marked on each Cask, *&c.* it muſt be ſet down oppoſite to the groſs Weight, and added up.

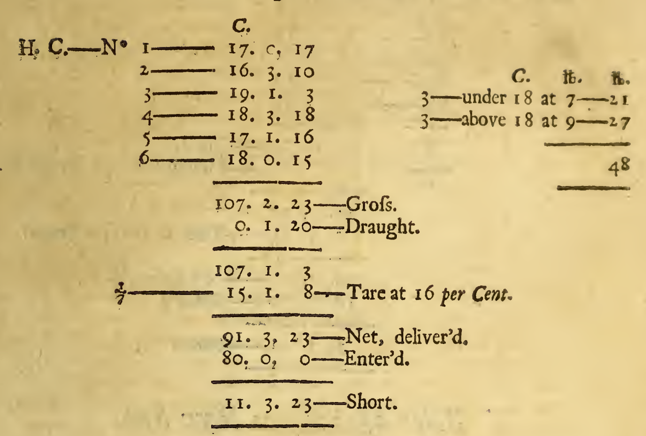

The ſeveral Tares being thus found and deducted from the groſs Weight, after the Allowance for Draught; the Remainder is the Net Weight, which (if the Nature of the Entry require it) may be reduced into Pounds, thus,

	C.	qr.	℔.
Firſt ſet down your Hundreds Weight, *&c.* as ſuppoſe—	10.	2.	24.
Then under the Hund^s^ directly, ſet down the Hund^s^ again—	10.		
Repeat the ſome one Space more to the Left-hand ——	10.		
And again, one Figure or Space further to the Left——	10.		
To which add the 2 *qr.* 24 ℔. or 80 ℔. on the 4th l. or thus—	80.		
And you have the Suttle Pounds of the Whole ——	1200.

Or thus:

Separate the Right-hand Figure of the Hundreds, half the reſt, it produces ons; from which deducting 1 $\frac{1}{3}$ Gallon for every Ton, it gives the Net Con-nts, as

Wine.

Florence Wines in Chests, are computed at 8 Gallons each; and all other Wines in Bottles after the Rate of 5 Bottles to the Gallon; with Allowance in Consideration of being above or under the usual Size.

EXAMPLE.

J.H. N° 1. to 30.——Chests *Florence* Wine, tallied at 5.

Chests ——— ——— ———	30
Gallons *per* Chest——— ———	8
Enter'd and Deliver'd———	240

Wines imported in Casks, if enter'd *fill'd,* are to be deliver'd by the Gauge of the Wine contained therein; but if enter'd *unfill'd,* according to the Gauge of the Cask, tho' it may not be near full.

For Gauging all manner of Casks, or other Vessels, I refer you to *Everard's Stereometry.* But for the Help of such as are not well skill'd in Arithmetick, here follows a Table for the casting up the Gauge of Buts, Hogsheads, or such like Casks of Wine or Oyl.

It shews $\frac{1}{3}$ of the Area at the Head, and $\frac{2}{3}$ of the Area at the Bung of any Cask, ready cast up in Gallons and 1000 Parts; so that measuring the Diameter of any Cask at the Head and at the Bung, and adding these two Numbers together, and multiplying that Product by the Length of the Cask (the Dimensions of the Cask being always understood within the Wood) and cutting off the three last Figures towards the Right-hand, you have the Content in Wine Gallons, and 1000 Parts of a Gall. For *Example*; suppose

The Diameters—	at the Head to be——— ———	28	Inches.
	at the Bung to be——— ———	34	
And the Length to be——— ——— ———		56	
Look in the Table	under the Title *Head,* and against 28 is found		0.888
	under the Title *Bung,* against 34 is found———		2.620
These, added together, make——— ——— ———			3.508
Which multiplied by the Length 56 produces ———			196.448

From which cut off the three last Figures towards the Right hand, and the Content will be 196 Gallons, and $\frac{448}{1000}$.

If the Diameters of the Cask, at the Head and Bung, happen to confift of Inches, and Parts of Inches, work thus:

Look into the Table for the next greater Number, anfwerable both to the Head and alfo to the Bung, fetting down what is found againft each of them, under their feveral Titles; in like manner look for the next leffer Number, fetting down what is found againft them; then fubtract the leffer out of the greater, and note the Difference; then take a proportional Part of the Difference (according to the Parts of Inches) and add to the Sum of the leffer Number, and proceed as before, when the Number of Inches was entire.

If the Length of the Cask happens to confift of Inches and Parts of Inches, multiply the Number of the $\frac{1}{3}$ of the Area at the Head, and $\frac{2}{3}$ of the Area at the Bung, by the next greater Number to the Length of the Cask, and alfo by the next Leffer, fubtract the Leffer out of the greater, and note the Difference; then take a proportional Part thereof (according to the Parts of Inches) which being added to the leffer Number (cutting off the three laft Figures towards the Right-hand) fhews the Content of the Cask in Gallons and Parts, as before.

EXAMPLE.

Example.

Suppose { the Diameters at the — { Head to be 26 $\frac{1}{4}$ / Bung to be 34 $\frac{3}{4}$ } and the Length to be — 48 $\frac{1}{2}$ } Inches

	Gallons.	1000 Parts.
Look in the Table under the Title *Head*.		
And against { 27 is found —	—	826
26 is found —	—	766
The lesser being subtracted from the greater — remains —	—	60
Which 60, being divided by 4 (the Denominator of the Fraction $\frac{1}{4}$) — gives —	—	15
Which being added to the lesser Number —	—	766
Makes the exact $\frac{1}{3}$ of the Area at the Head —	—	781
Look in the Table under the Title *Bung*.		
And against { 35 is found —	2	776
34 is found —	2	620
The lesser being subtracted from the greater — remains —	—	156
Which being divided by 4 (the Denominator of the Fraction $\frac{1}{4}$) gives in the Quotient 39; that multiplied by 3 (the Numerator of the Fraction $\frac{3}{4}$) — produceth —	—	117
Which being added to the lesser Number —	2	620
Makes the exact $\frac{2}{3}$ of the Area at the Bung —	2	737
To which, adding $\frac{1}{3}$ of the Area at the Head —	—	781
You have the mean Area, or Content of the Cask —	3	518
Which multiply'd by 49. (the next greater Number to 48 and $\frac{1}{2}$ the *Length* of the Cask) produces —	172	382
And by 48 (the next Number less than 48 and $\frac{1}{2}$) produces —	168	864
The less being subtracted from the greater — remains —	3	518
The Half whereof is —	1	759
Which being added to the lesser Number —	168	864
Make —	170	623

From which cut off the 3 last Figures to the Right-hand, and you have the Content of the Cask, *viz.* 170 Gallons, and $\frac{623}{1000}$ Parts of a Gallon, which being reduced makes near $\frac{5}{8}$. —

Or

	Gallons.	1000 Parts
Or multiply the mean Area of the Cask	3	518
By 48 (the next Number lefs than 48 ½ the Length) the Produce is	168	864
And (for the Fraction ½) take ½ of the 3.518, being	1	759
Which, being added together, make as before	170	623

PAR-

PARTITION

The

THIRD.

From what has been offer'd in the First and Second Partitions of this Treatise, it is humbly conceived the Duties payable Inwards and Outwards (or Coast-wise, as to Coals, &c. *) may be computed with Certainty, and without Difficulty, even by Persons of a very shallow Capacity; however, lest any should be mistaken in their Judgment, or guilty of an Escape, or wrong in their Operations, I have, in this Partition, not only furnished them with an Alphabetical Table of the* RATES *of Merchandize, but also with the total Net Amount of the several Duties payable upon all Goods whatsoever, imported, both Rated and Unrated, and of the Sums to be drawn back upon Exportation of the same, in Time; with proper References whereby to know the particular Branches which compose each Sum; together with a Table of the* Net Duties *payable upon certain Goods carried Coast-wise, and likewise the* RATES *of Merchandize Outwards, with the* Net Duty *of such Goods as are liable thereto.*

FOR the better understanding the Table *Inwards*, please to observe,

1. That the Words in *Italick*, on the Left-hand Page, are either Goods paying Duties *ad Valorem*, or some Alterations or Additions made since the Rates were granted in *Anno* 1660.

2. That, the Figures, in the first Column on the Right-hand Page, are the Rates charged upon sundry Sorts of Goods imported, from which the Duties and Drawbacks are to be computed; and where there there is no such Rate inserted, those Goods are, either Unrated, or chargeable with some Duty, which has no Relation to the Rate.

3. That,

3. That the Duties payable Inwards are calculated for Goods imported by a ritiſh Merchant, and in a *Britiſh* Ship, for which Ready Money is paid, and erefore all Diſcounts deducted; to which adding the Aliens Duty (as ſet rth in a particular Table, before Rates Inwards) for ſuch Goods as are liable ereto when imported in Foreign Bottoms, and for all Goods belonging to rangers, you have the Net Duties to be paid, or repaid, in all Caſes whatſo-er.

4. That, when two, three, or more Sums are circumflex'd together by Brace to the Right-hand facing the Figures, it denotes, that all thoſe Duties e payable upon the Goods to which the Circumflex belongs; or that the oods have a Reference to ſome Duty at the Foot of the Brace; thus, *Adzes Coopers*, pay, partly by the Dozen, and partly by the Hundred Weight, and *rbers Aprons or Checks* are chargeable, by the Rate, and likewiſe by the alue.

5. That, the Letters to the Right-hand, oppoſite to each Sort of Goods, are eferences to a Table at the End of Rates Inwards, by which you ſee, at a lance, the particular Branches of which the ſeveral Net Duties conſiſt; and ill be a very great Direction to the Officers in their reſpective Computations.

6. That, the Duties both Inwards and Outwards are charged, as ſuppoſing e ſeveral Goods may be legally imported or exported, without any Regard d to the Prohibition of ſome particular Goods; for which I refer to the dex.

7. And, that the Sums, to be paid or repaid, conſiſt of Pounds, Shillings, nce, and Twentieth Parts of a Penny.

The Duties are calculated ſo exactly, as not to differ from the moſt critical alculation, one Fortieth Part of a Penny, on any one Commodity, and will of the greateſt Uſe and Advantage, both to the Officers of the Cuſtoms, d to the Merchants, as well for their Information, as for proving and examin-g all Entries of Goods whatſoever, by multiplying the ſeveral Duties by the uantity of Goods.

In ranging the Goods both Inwards and Outwards, I have obſerved the Or-r in which they follow in the old Book of Rates, ſo far as to keep always oth to the ſame Letter and general Head, under which they are to be found ere; but have diſpoſed the Goods under each Letter and general Head, more cceſſively in the Courſe of the Alphabet, taking in likewiſe, in their Order, ch Goods as are not to be found under the initial Letter, but under a parti-lar Head, or ſome other Name; alſo thoſe ſince charged with New Duties, d others that are particularly chargeable from the Value.

PAR-

PARTITION

The

FOURTH.

In this Divifion, being to give you a View of the LAWS *relating to the* Cuftoms, Navigation, *and* Trade, *as they at prefent ftand; to avoid repeating what occurs in the Three firft Parts, I have in the Courfe of the Alphabet intermix'd proper References to the fame, and thereby render'd this laft Part a* GENERAL INDEX *to the Whole.*

FOR the better underftanding whereof, pleafe to obferve,

1. That, to avoid Repetition, I have feldom noted the fame thing under any two Heads, and therefore at the Foot of moft of them, I refer to fome Matter or Circumftances relating to the fame, but more naturally couched under fome other Head: Thus, in *Ships*, you find Reference defired, to *Apprentices, Cattle, Coals, &c.* to which, if you turn, you will find fomething in each of them, that refpects, or affects, *Ships.*

2. That, where, under any Head, a fhort black Line points from the Left-Hand Side, to any following Particulars, it denotes, that they all have a Relation to the faid Head; but when the faid Line is yet fhorter, and does not extend fo far towards the Left-Hand, the Meaning is, that all the Particulars fo pointed to, have Refpect to the Article immediately preceding, and not to the general Head: Thus, in *Ships*, the 10, 11, 12, 13, 29, 30, 31, 32, Articles have Refpect to the Word *Ships* in general; the 1, and 2, to *Britifh* Ships; the 3, and 4, to *Scotch* Ships; the 5, 6, 7, 8, 9, to *Foreign* Ships; the 21, 22, 23, 24, 25, 26, 27, 28, to Ships in *Diftrefs*; and the 14, 15, 16, 17, 18, 19, 20, to Ships coming into the *Port* of *London.*

Deſigned

o render the ſaid VIEW complete to the End of the
Seſſion of Parliament, *Anno undecimo* GEORGII.

By *HENRY CROUCH*,
Of the CUSTOM-HOUSE, *London*.

LONDON:

Swan* in *Pater-noſter Row*, and W. BELL, at the *Croſs-Keys* and
Bible in *Cornhill*. M.DCC.XXV.

THE PREFACE.

A *Great Part of the* Complete View *of the* British Customs *having been render'd imperfect by these last Two Sessions of Parliament, I was willing* [t]*o afford my further Assistance, by pub-*[l]*ishing the* several Alterations; *especially* [w]*hen I consider'd the particular Service* [i]*t would be to the* Officers of the Customs [i]n the Out-Ports, *who for want of more* [E]*xperience, must too frequently be mi-*[st]*aken in charging the Duties on Goods* [t]*hat are not expresly Rated in the* for-[m]er Book of Rates; *and which I was* [v]*ery apprehensive would be the Case, with* [R]*espect to the* Additional Rates, *which*

only

only aſſigning a fixed Valuation *to certain Merchandizes imported, a more than ordinary Knowledge in the Cuſtoms is required to charge each Species of Goods, with the particular Branches to which they are ſubject.*

I likewiſe conſider'd the Service of the fair and honeſt Importers, *whom I take to be worthy of all imaginable* Information *of the Conditions upon which they may lawfully trade ; (for by reaſon of the vaſt Extenſiveneſs of the Cuſtoms, they muſt naturally be leſs acquainted therewith than the Officers, whoſe only Province it is ;) therefore have endeavour'd not to omit any thing that ſhould be for their* Uſe *or* Advantage.

I have reviſed my COMPLETE VIEW, *and corrected the* moſt material Errors, *alter'd ſuch Parts of the* ſeveral Branches *as have been affected ; likewiſe the* Duties *and* Drawbacks *of* Drugs *and* ſome other Goods *rated by the* former Rates, *with ſeveral of the Examples of the* Computation ; *and added the* Inland Duty *on* Coffee, Tea, *&c. the* additional Rates *of Merchandize impor-*

imported, with the total Net Duties and Drawbacks.

Where only a Part of a Clauſe or general Head has been alter'd, I have here repeated the Whole, *that the Senſe might appear entire at one View; ſo that the former muſt be* cancell'd, *and only the latter* regarded.

The Inconvenience which was apt to ariſe from having the Goods *and* Rates, &c. *printed on different Pages, is here prevented, by printing them* all on the ſame Page; *for the black Lines which pointed from the Goods to the Figures, being cloſe, and ſeveral of them pretty long, and the Binder not always obſerving to place them* exactly oppoſite, *the Reader was ſometimes liable to be* miſguided.

Throughout the Whole, I have purſu'd the ſame Method *as in the former, which I preſume is as intelligible as the* Smallneſs of the Size *will admit of; and what any one of a* tolerable Capacity *may, by Application, comprehend.*

Such

Such Branches as have been altered, or imposed since the Publication of the Complete View.
